# Why Choose Sí?

Sí provides students with flexible, stackable qualifications in various career pathways, recognised worldwide. Our programme is designed for individuals seeking to fast-track their academic and professional goals. Through comprehensive courses and partnerships with top universities, Sí prepares students for successful careers and advanced degrees.

## Programme Goals

- Provide foundational and advanced skills to prepare students for career readiness and further study.
- Offer flexible, stackable qualifications with seamless progression from diplomas to degree programmes.
- Deliver globally recognised qualifications accredited by ATHE and Qualifi, enhancing international career and academic opportunities.

## Key Benefits

- **Flexible Learning:** Study at your own pace with online courses tailored to fit your schedule.
- **Global Accreditation:** Earn qualifications recognised by ATHE and Qualifi, opening doors to international career and academic opportunities.
- **Industry-Relevant Learning:** Engage in practical assignments and case studies that reflect real-world challenges, enhancing your employability.

# Accreditation & Partnerships

Sí courses are accredited by ATHE and Qualifi, and recognised on the Ofqual Register. Our academic partnerships with prestigious institutions, such as the University of Bolton and Bangor University, provides seamless progression for students who wish to continue their studies with a Bachelor's top-up degree.

# Programme Structure

## Course Overview

This course deepens students' understanding of psychological theories, research methodologies, and applied psychology. It prepares students for advanced study or roles in mental health, education, and human resources, focusing on areas such as cognitive psychology, behaviour, and psychological assessment.

## Admission

Students must be 18 years or older and have a suitable academic background, such as a Level 4 qualification or equivalent. Non-native English speakers should meet a minimum English language proficiency level of IELTS 5.5 or equivalent.

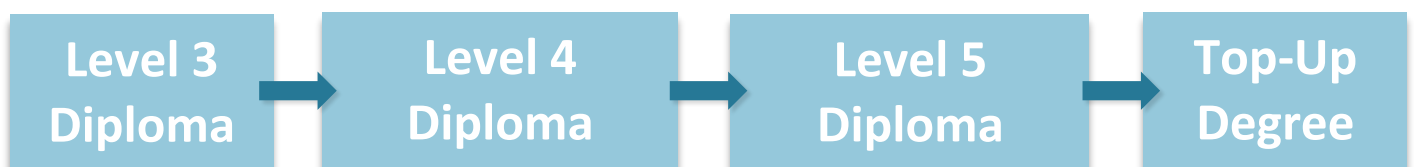

## Assessment Methods

Students will complete a portfolio of evidence, which includes a combination of 6 written assignments covering key topics within the psychology sector.

## Technical

Our platform is fully technology driven; therefore, students will need a reliable PC, laptop, or tablet, or regular access to the aforementioned.

Students will need a stable internet connection with sufficient data to access online resources and participate in programme activities.

# Course Structure

- 1. Psychological Approaches to Depression and Schizophrenia (20 credits)**

This module equips students with the knowledge and understanding of issues relating to mental health and psychopathology.
- 2. Individual Differences: Intelligence, Personality and Criminology (20 credits)**

This module aims to equip students with the knowledge and understanding of “personality” and “intelligence.” These concepts represent fundamental human attributes that significantly influence cognition, motivation, and behaviour across various contexts.
- 3. Visual Perception in a Psychological Context (20 credits)**

This module aims to equip students with the knowledge and understanding of visual perception and the primary ways we gather information about the world around us and about ourselves.
- 4. Social Psychology: Pro-and Anti-Social Behaviour (20 credits)**

This module aims to equip students with the knowledge and understanding of social psychology, focusing on how people think, feel, and act in relation to others and the world around them.
- 5. The Diversity of Addiction (20 credits)**

This module aims to equip students with the knowledge and understanding of substance use and non-chemical addiction disorders, which are complex conditions that impact reward, reinforcement, motivation, and memory.
- 6. Contemporary Issues and Debates in Psychology (20 credits)**

This module aims to provide students with knowledge and understanding of current issues and debates in psychology. It introduces students to codes of conduct and ethical guidelines in the field, as well as the role psychologists play. Additionally, the module covers biases in psychological research and explores key debates within the discipline.
